

**PRODUCT:**

- 250-0002: ST9 2500 Quint Power End

**MODIFICATION:**

- 1) The bull gear bolt will now be an allen key head instead of hex head. Cross-drill for safety wire will remain.
- 2) No immediate change is needed for current Liberty power end assets

**DETAILS:**

All future ST9 quint power ends will now include the allen key bolt on the right hand side of the below picture. This change was made to for further strength and stability of the bull gear assembly.

The allen key bolt is 1.25"-7 and drilled with a 1/8" hole for safety wire. Please notify warehouse managers to stock extra of these components if needed.
